AIMS & OBJECTIVES OF AGASSI

To bring together scientists — medical physicians, surgeons, basic scientists, students and other professionals from different fields, involved/working in the areas of aging, gender, andrology, sexual sciences, and other related specialties (and other related sub-specialties as may be decided upon from time to time) under ONE forum on EQUAL footing. In this sense, AGASSI will be different from other societies where differential membership status such as “associate” is allotted to many members. Such members are usually denied even voting rights. There will be no such discrimination within AGASSI.
