

Meet Guest Editor

Dr. Bradley Anawalt

Chief of Medicine at the University of Washington Medical Center and Professor and Vice Chair of the Department of Medicine at the University of Washington.

Major Research Interests

Dr. Bradley Anawalt's principal areas of research are in male infertility, male hormonal contraception and male reproductive physiology. His excellence in teaching has been recognized with several University of Washington Department of Medicine teaching awards: 2014 Marvin Turck Award for excellence in teaching and clinical care, 2007 Endocrinology Fellowship Teaching Award, and 1999 Paul Beeson Award (selected by the internal medicine residents). He has been the North American editor for the *Journal of Clinical Endocrinology* (2012–2020) and has served on the editorial board of the *Journal of Clinical Endocrinology and Metabolism* (2006–2010 and 2010–2014). He serves as a consultant to the United States Anti-Doping Agency. He has had leadership positions in the United States Endocrine Society including Council member (2014–2017), Chair of the Hormone Health Network (2010–2014) and Clinical Chair of the 2011 Annual Meeting. His clinical focus is in the area of male reproductive endocrinology, and he has received several national and regional awards from his peers for clinical expertise.

He earned his bachelor's degree in anthropology at the University of Santa Clara and his medical degree at the University of California at Davis. He completed his internal medicine residency at the University of Washington in 1992 and served as chief resident at the Seattle VA Medical Center 1992–1993. He completed a fellowship in endocrinology at the University of Washington and joined the faculty in 1995. He lives in Seattle with his wife and three daughters.

Relation to AJA

I have worked on two special issues of *Asian Journal of Andrology* (AJA) on topics devoted to male reproductive endocrinology. Each time I have greatly enjoyed working with researchers and scholars from around the world. The AJA Editorial Office staff are passionate about excellence in research and publishing in the field of andrology. It has been an honor to work with them.
