

Meet the Expert

Ranjith Ramasamy, M.D.

Dr. Ranjith Ramasamy is the Director of Male Reproductive Medicine and Surgery as well as an Associate Professor in Department of Urology at the University of Miami in Florida. As a Urologist and Microsurgeon, Dr. Ramasamy specializes in the treatment of disorders of male infertility and sexual medicine. He is an expert in vasectomy reversal and penile prosthesis surgeries. Dr. Ramasamy completed his Urology residency training at Weil Cornell Medical College and New York-Presbyterian Hospital. He then completed a National Institute of Health sponsored fellowship in Male Reproduction medicine and Surgery at Baylor College of Medicine. In addition to his clinical accolades, Dr. Ramasamy has been integral to the advancement of male reproductive medicine and surgery.

Major Research Interests

To date, he has published over 200 manuscripts in peer-reviewed journals and several book chapters; he currently serves on the editorial board of *Andrology*, *Asian Journal of Andrology* and *Urology* as well as as an editorial reviewer for medical journals such as *Journal of Urology*, *Fertility and Sterility*, *European Urology* and *British Journal of Urology*.

Furthermore, he has been invited to lecture at numerous international conferences including the American Urological Association, Chinese, Malaysian and Indian Society of Assisted Reproduction. Outside of clinical medicine and academic research, Dr. Ramasamy has made a significant effort to share his wealth of knowledge and serve as a mentor for future urologists. He created 'Urology' an app used by trainees across the world to help prepare for urology board examinations. As a physician, Dr. Ramasamy maintains a dedication to patient care, academia and the training of future urologists by directing a fellowship program in andrology.

Relation to Asian Journal of Andrology

I am honored to currently serve on the editorial board of *Asian Journal of Andrology* (AJA). Enhanced global collaboration with Urologist and researchers will help to facilitate the production of paradigm shifting research.
