

Sperm Fertility Analysis through Innovation

Biophos is a Swiss based company, started in 2006, who developed the most innovative CASA system, based on significant scientific knowledge and customer insight. Our goal is to produce the most effective and efficient solution for sperm analysis.

Human

- Compliant with WHO standards
- Modular system
- Intuitive system, easy to learn
- Open system, using standard components
- Multi-Result Data Base system with interfaces

More

- High reliability for difficult samples
- Fastest and most precise system on the market
- Automatic image optimization
- Morphology is adapted to various staining
- Digital sperm washing
- Single key handling
- Compliant with several interlaboratory certifications

QualiSperm™

- Motility (WHO classes)
- Concentration (0,1 – 150 Mio/mL without diluting!)
- Morphology (WHO and strict Kruger criteria's)
